製作步驟

1. 地址：[LMarena](#)；
2. 修改上方「Battle」為「Direct Chat」模式；
3. 選擇下方輸入框為「Generate Images」模式，上傳所選圖片；
4. 輸入以下任一風格提示詞並等待生成圖片。

風格一：

A hyper-detailed, realistic 1/7 scale action figure of the character from the provided illustration, posed dynamically on a computer desk. The posture, clothing are exactly as in the photo.

The figure stands on a circular, crystal-clear acrylic base (no text or logos).

A modern computer desk. On the left side of the desk, a monitor screen vividly displays the ZBrush software interface, showing the 3D model of the same figure in a mid-sculpting phase (visible wireframe and clay renders).

Background, on the right side of the desk: A BANDAI-style window box packaging with a vinyl window see-through the figure. The box is pristine and features high-quality print of the original character artwork on the front. The box is slightly angled to show its 3D form.

Extremely high detail, depth of field. Set the entire scene indoors, the environment should feel like a professional figure collector's personal workspace with a beautiful environment.

風格二：

Please turn this photo into a character figure. Behind it, place a box with the character's image printed on it. Next to it, add a computer with its screen showing the Blender modeling process. In front of the box, add a round plastic base for the figure and have it stand on it. The PVC material of the base should have a crystal-clear, translucent texture, and set the entire scene indoors.
